Author Index—Volume 40 (2002)

(The issue number is given in front of page numbers)

Alves Filho, H., F.C. da Silva and R.C. Barros, A coarse-mesh numerical method for one-speed neutron transport eigenvalue problems in two-dimensional Cartesian geometry (1–2) 167–177

Arminjon, P., A. St-Cyr and A. Madrane, New two- and three-dimensional non-oscillatory central finite volume methods on staggered Cartesian grids (3) 367–390

Bailey, C., H. Lu and D. Wheeler, Computational modeling techniques for reliability of electronic components on printed circuit boards (1–2) 101–117

Barrera-Sánchez, P., G.F. González Flores and F.J. Domínguez-Mota, Some experiences on orthogonal grid generation (1–2) 179–190

Barros, R.C., see **Alves Filho, H.** (1–2) 167–177

Bourchtein, A., Semi-Lagrangian semi-implicit space splitting regional baroclinic atmospheric model (1–2) 307–326

Bourchtein, A., L. Bourchtein and J.P. Lukaszczyk, Numerical simulation of incompressible flows through granular porous media (1–2) 291–306

Bourchtein, L., see **Bourchtein, A.** (1–2) 291–306

Bravo, E., see **Rubio, O.** (1–2) 327–336

Burrage, K., see **Williams, R.** (3) 415–432

Cameron, I., see **Williams, R.** (3) 415–432

Castillo, J. and T. McGuinness, Steady state diffusion problems on non-trivial domains: Support operator method integrated with direct optimized grid generation (1–2) 207–218

Castillo, J., V. Pereyra and S. Steinberg, Preface (1–2) 1–1

Castillo, J., see **Torres, C.R.** (1–2) 235–244

Chávez-González, A., A. Cortés-Medina and J.G. Tinoco-Ruiz, Testing the quality of grids generated using the direct approach (1–2) 191–206

Chávez-González, A., see **Cortés-Medina, A.** (1–2) 219–233

Chen, B. and Y. Li, Simulation of thick biofilm growth at the microscale (1–2) 261–271

Chen, B., see **Li, Y.** (1–2) 245–259

Chiwiacowsky, L.D., see **Claeyssen, J.R.** (1–2) 119–135

Claeyssen, J.R., L.D. Chiwiacowsky and G.C. Suazo, The impulse response in the symbolic computing of modes for beams and plates (1–2) 119–135

Claeyssen, J.R., see **Rubio, O.** (1–2) 327–336

Cortés-Medina, A., A. Chávez-González and J.G. Tinoco-Ruiz, A direct finite-difference scheme for solving PDEs over general two-dimensional regions (1–2) 219–233

Cortés-Medina, A., see **Chávez-González, A.** (1–2) 191–206

da Silva, F.C., see **Alves Filho, H.** (1–2) 167–177

De Bortoli, A.L., Multigrid based aerodynamical simulations for the NACA 0012 airfoil (1–2) 337–349

de Campos Velho, H.F., see **Retamoso, M.R.** (1–2) 87–100

0168-9274/2002 Published by Elsevier Science B.V. on behalf of IMACS.
PII: S0168-9274(01)00172-6

Domínguez-Mota, F.J., see **Barrera-Sánchez, P.** (1–2) 179–190

Farrell, P.A., A.F. Hegarty, J.J.H. Miller, E. O'Riordan and G.I. Shishkin, An experimental technique for computing parameter-uniform error estimates for numerical solutions of singular perturbation problems, with an application to Prandtl's problem at high Reynolds number (1–2) 143–149

Gabriel, R., Minimization of the Frobenius norm of a complex matrix using planar similarities (3) 391–414
Garwood Jr., R.W., see **Ly, L.N.** (1–2) 351–366
González Flores, G.F., see **Barrera-Sánchez, P.** (1–2) 179–190
González-Requena, R.J. and J.M. Guevara-Jordan, New approach for describing transient pressure response generated by horizontal wells of arbitrary geometry (4) 433–449
Good, M., J.-P. Goux, J. Nocedal and V. Pereyra, iNEOS: An interactive environment for nonlinear optimization (1–2) 49– 57
Goux, J.-P., see **Good, M.** (1–2) 49– 57
Guevara-Jordan, J.M., see **González-Requena, R.J.** (4) 433–449

Hegarty, A.F., see **Farrell, P.A.** (1–2) 143–149
